#### **FOREWORD**

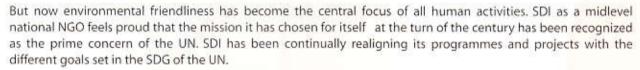

Dear patrons and partners in development,

Greetings from SDI

With much pleasure I am presenting our Annual Report 2019 to you. The annual report covers financial reporting period for the year 2018-2019. However, as regards social development components, we have taken liberty to make the report updated until stop press time so to say.

At the time of its founding the mission SDI has set for itself is to pursue a path of development that will not destroy the future of our coming generations. In early

1990s the global awareness and demand for +ve actions against global warming, need for climate change adaptation, environmentally friendly agriculture, architecture, enterprises and industries, transportation were not so loud.

SDI has grown from strength to strength. SDI's MF portfolio has crossed the (outstanding Tk. 2.2 billion in June 2019, ME borrower 18863 and serving about 122000+ grassroot people belong to poor farmer households. SDI has been working for poverty alleviation—by facilitating ordinary people's access to literacy, knowledge, health care, sanitation, personal and environmental hygiene, financial resources, technology & inputs gender equity, adolescent life skill education, entrepreneurship development, nutrition promotion. The intervention by SDI has been able to pull up most of its grasroot partner families from the life of poverty, deprivation, illiteracy, insecurity, malnutrition, gender based injustices. Created opportunities and options for social mobility for women in particular. A large number of extreme poor—had become successful entrepreneurs and could improve their quality of life, could sent children to school, build good house to live, and most important of all—have skill and positive attitude to live a meaningful life with human dignity.

SDIs focuses on the issues of alleviation of the quality of life of the people at the bottom of the scale of human development index. SDI' intervention were mostly focused on women. Our women partners have beenable significantly improve the quality of life of families. Women's status has enhanced and many social injustices against women are being reduced. Women are having their effective representatives in the local elected bodies.

SDI's mission of knowledge based poverty reduction of the people is contributing towards raisingfarmers awareness regarding environment friendly agriculture. SDI had introduced salinitytolerant rice. In Dhamrai Upazila, SDI had launched a campaign for producing toxic chemical pesticide free i.e. safe vegetables, safe meat. The partner farmers of Savar and Dhamrai of Dhaka district and Singair of Manikganj district have been getting high yield of better quality safe vegetables using bio-pesticides.

SDI could make the farmers believe that indeed it is possible to grow good crops by applying organic fertilizers and it is possible toreplace use of chemical fertilizers gradually. We express our thanks and gratitude to PKSF and its visionary leaders for their patronization and guidance to the farmers to grow 'bieshmukta (poison free)' vegetables.

SDI has developed partnership with several mainstream banks to provide credit to its grassroots partners. SDI used the credit line received from banks mainly in agricultural sector. Presently SDI is promoting Credit + activities in agricultural sector in its programme footprint areas.

At this point it may be relevant to mention that the Farmers Training Centre (FTC) of SDI at Sutipara, Dhamrai. The FTC was constructed with substantial contribution from Japan Grant Fund, The FTC is running since May 2016 and providing advanced hands on training on environment friendly agricultural practices. Annually in 2019 it can provide training to 1900+ no of small farmers. The training centre is addressing a niche of community level agricultural resource persons who can give qualified help to the farmers. We thank the people of Japan for its support to SDI in its Endeavour.

SDI is now actively planning to expand the Integrated Resource Centre (IRC) adjacent to the FTC. The plan includes establishing a School, College and Diagnostic Centre, a veterinary hospital and a Technical Training Centre for Women, to provide services to the farmers and unskilled women in the area.

SDI is proud to state that SDI is among highly selective number PKSF partners who have the privilege of **special innovative sectoral loan and development inputs.** The MFI profile of SDI is becoming more farmers friendly as could be seen from SDI's initiatives with PKSFs policy and financial portfolio loans towards farmers friendly initiatives like Ujjibito, Agricultural Seasonal loan, Credit for farming of non-toxic vegetables, safe meat and safe protein and LIFT, Sanitation, Drinking water.

The Livestock unit and Agricultural unit are helping the livestock and agricultural farmers to properly utilize the loan received for raising cow or goats and poultry and innovative agricultural farming. Currently SDI is piloting Medicare Service Risk a Fund Scheme for its grassroots partners. SDI had also launched an Agriculture and Livestock Unit in Dhamrai. The purpose of this unit is dissemination of appropriate agricultural and livestock farming technologies, know how and practices.

ENRICH is most focused program. Providing multiple credit along with development inputs is its characteristics. SDI is implementing the project in two unions namely Harishpur union of Sandwip Upazila and Baniajuri union of GhiorUpazila.

SDI has installed Datasofts's Microfin360 AIS/FIS software to digitalize specially its Micro Finance operations. The SDI MF management team is able to get information on any region or a branch or a particular loan case at its finger-tip.

SDI's programme for skill training and credit for external job market is helping trained people to get employment within the country and out of the country also. Trainees were able to get employment with Bangladeshi electronic goods manufacturers as well as got jobs in Middle Eastern countries.

SDI also initiate to provide skill training to young unskill and semi-skill women on garments machine operations, outsourcing and mobile repairing for creation of job opportunity both in country and abroad.

SDI had hold a non-toxic vegetable exhibition at the premises of the Farmers Training Center (FTC).

During the reporting period, SDI had expanded its CSR activities. SDI had provided both financial and material assistance to freedom fighters and senior citizens of the area. They were also given health care and medication services. SDI is holding eye camp for screening people with cataract and also arranges removal of cataract and insertion lenses and spectacles and Medicare costs. SDI is also providing blood grouping and testing of blood sugar to people of Dhamrai upazila. The satellite clinics are being held in various locations in Dhaka, Manikganj and Tangail, especially in locations where SDI has its programmatic footprints.

SDI had initiated an incentive program of giving prizes to farmers who had achieved success in various field of farming activities. For the period 2018-2019, SDI had given awards to 13 farmers.

We express our gratitude and admiration for our patrons and partners at grassroots and staff members for their continued trust and support, contribution and participation, dedication and commitment without which SDI could not have achieved what has been stated above. We thank our development partner PKSF and its' associates, OXFAM for the continuing partnership to strengthen SDI's capacity to respond to any natural hazard situation and mainstreaming of gender justice and equity in its organizational policies and practices.

SDI welcome and will gratefully acknowledge readers feedback to enrich our future report

With Thanks

(Shamsul Haque)

Executive Director and CEO of SDI

#### SOCIETY FOR DEVELOPMENT INITITIATIVES (SDI)

#### GOVERNACE:

Establishment:SDI was established in 1993 by a group of like minded self motivated development workers who were imbibed with the zeal to address the social maladies with a vision of realizing the human potential of the disadvantaged and powerless, alienated from the social, economic and institutional resources. SDI is a platform which has drawn NGO professionals who have adopted social development as a life time mission. The rich and diverse experience of the initiators is its unique asset.

SDI's Creed: "Development that meets the needs of the present without compromising the ability of future generations to meet their own needs"

SDI's Mission: The initiative or the agenda is to trigger a self-empowerment process whereby the poor and powerless can take charge of their own self actualization agenda and empowering people for participation in the decision making process effecting their own lives.

Legal Status: SDI is a non profit social development Enterprise organization Registered with (1) Social Service Department. GoB, (2) NGO affairs Bureau, (3) Registrar of Joint Stock Company and (4) Registrar with Micro credit Regulatory Authority, SDI is eligible to receive external grants and also for operation of Micro credit, Micro enterprise and other development programs with local and external grant and credit fund)

Management Structure of the Organization: The highest body of the organization is the General Body (GB) consisting of 31 members. The General Body elects an Executive Committee (EC) consisting of 7 members for a three-year period. The GB and the EC are headed by the Chairman. On the EC, apart from the Chairman, there is a Vice Chairman, an Assistant Secretary and a treasurer. The Executive Director of the SDI acts as the Member Secretary of the organization. The EC is accountable to the GB. The Executive Director in turn is accountable to the EC. For day to day running of the organization, a Deputy Executive Director assists the Executive Director.

#### **Executive Committee (EC):**

| Name of Members            | Principal Occupation  | Designation          |
|----------------------------|---|----------------------|
| Prof. Dr. Md. Abul Hossain | Ex Pro-VC of Jahangirnagar University                                       | Chairman             |
| Mr. S.M.Gulam Mustafa      | Md Jamalpur Fashon Ltd. Dhaka.  | Vice Chairman        |
| Mr. Sushil Kumar Sarkar    | Head Master, Bhalum Ataur Rahman Khan School<br>and College, Dhamrai, Dhaka | Secretary General    |
| Mrs. Aleda Sultana         | Coord, -Education Program. CDL  | Asstt. Secy. General |
| Mr. Md. Shah Alam Bhuyan   | Businessman, Korotoa Road, Bogura.  | Treasurer            |

| Ms. Nargis Sultana         | Housewife   | Executive Member     |
| Md. Shamsul Haque          | Executive Director of SDI   | Member Secretary     |

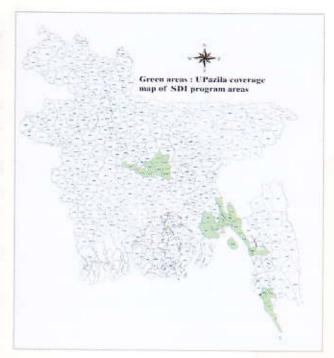

Annual General Meeting (AGM): The general body members of SDI holds at least one annual meeting (AGM) in a year. If necessary more meeting are held.

**Executive Committee (EC) Meeting:** Usually quarterly EC Meeting held. If necessary more meeting may be held.

Coordination Meetings (Regional, Central): SDI hold regular periodic coordination meetings at its Regional offices and Annual Coordination meeting is held at SDIs central Office.

REGIONAL /AREA/BRANCHOFFICES AND LOCATIONS: SDI had been operating 12

Regional Office or 70 Branch Offices and 3 project offices.

| Staff strength of SDI: Type of Staff | Total Numbers | Men | Women |
|--------------------------------------|---------------|-----|-------|
| Regular                              | 666           | 585 | 81    |
| Volunteers                           | 192           | 109 | 83    |

#### INSTITUTIONAL STRENGTH

**SDI'S CORE STRATEGY:** Investing more in women directly to reduce poverty through substantial economic and social pay off is the core strategy pursued by SDI. Empowerment of rural poor and hard to reach poor specially women and fringe communities by way of creation of jobs and sustainable livelihood and access to credit without collateral.

SDI pursues a sustainable human development policy, which is pro-poor, pro-nature, pro-jobs and prowomen. SDI aims at alleviation of poverty and empowerment of the poor in more operational terms such as access to institutional supports and facilities (for credit, technical, health, and education services) and concurrent fostering of local institutions which fights against threat to human rights, political rights and threatens environment.

- Self directed development and ultimate ownership of the initiatives by the people themselves.
- To strengthen the capacity of its object population for sustainable development and serve as a synergic resources to achieve it.
- To focus its resources on a series of objectives central to sustainable human development
- Facilitation of sustainable livelihood enhancing social conditions for rural women.
- Protection, promotion and regeneration of environment
- Improving access to health care and health education for practice of hygiene and behavior changes.
- RIGHTS based approach Advocacy and social mobilization for human and children's right.
- Improving Humanitarian Capacity Building.
- Technology support for speed up income.

#### List of Policies and Guidelines

- 1. Rule of Employee gratuity Fund
- Procurement Policy
- 3. Saving and Credit Manual
- 4. Accounting manual
- 5. Internal Audit Manual
- 6. Personnel Procedure
- 7. Training Manual
- 8. NonFormal Children's Education Manual
- 9. Guideline for Hardcore Poor friendly programs/projects
- 10. Guideline for General Poor friendly programs/projects
- 11. Society based Cyclone shelter management Manual

- 12. Ultra Poor Savings and Credit Manual
- 13. Guideline for bay fisher occupational safety
- 14. Guideline for sweet water (natural) fish protection
- 15. Land transfer procedure
- Gender Policy
- 17. Policy on Disabled people
- 18. Emergency Disaster Response Policy
- 19. Climate Change Adaptation Policy

#### Gender Policy:

SDI is a gender sensitive organization. In this context the policy and commitment of SDI is both consistent with Beijing Plus declaration to fight all forms of discrimination against women.

#### Child rights Policy:

SDI has adopted Childs Rights Policy in compliance with the UN as well as the policy adopted by the Govt. of Bangldesh

#### Disability Policy:

SDI has adopted its policy which closely follows the policy OXFAM UKs Bangladesh has formulated and circulated to its partners.

#### Zero Tolerance Policy:

In case misdemeanor or making aspersions to women on the ground of gender is considered a grave breach of discipline and comes under the policy of zero tolerance pursued by SDI

#### Pro hard core poor policy:

To outreach the bottom rung of the poor (termed hardcore poor), SDI had developed its own strategy of outreaching these people. Initially to address the HCP niche with interventions for alleviating their poverty to threshold level and then inducting into the existing development intervention scheme.

#### Complaint Mechanism:

At the time of issuing of letter of appointment each employee is given ToC of employment, which includes the complaint mechanism and its different stages. It also gives the direct phone number of the Executive Director as the last resort for a complainant.

#### Networking:

SDI is members of the following National and International networks and Partners

#### **National Networks:**

Credit and Development Forum (CDF), NGO Forum, Federation of NGOs in Bangladesh (FNB), Coastal Fisher folks Community Network (COFCON), Disaster Forum. Centre for Sustainable Rural Livelihood (CSRL), WECAN, NARI FORUM, NIRAPAD.

#### International Networks:

International Institution of Rural Reconstruction (IIRR) Philippines, Asia Pacific Region Micro credit Summit Meeting of Council (APRMS), Asian Resource Foundation (ARF), Thailand, International Union of Anthropological and Ethnological Sciences(IUAES).

#### Partners:

Government of Bangladesh PalliKormo-Sohayak Foundation (PKSF), Oxfam-GB, GiZ Germany, Bangladesh Bank (BB), DCC/ UPPR/ UNDP, NGO Forum, Bank Asia Ltd, Oxfam International, Gov. of Netherlands-IFAD, EU, South East Bank Ltd., MTBL, National Bank Ltd., Japan Grant.

#### COMPETENCY OF SDI

#### Strength of the SDI in terms of community development and women empowerment Initiatives

Since inception SDI had implemented multi sectoral integrated projects, covering adult functional literacy, non-formal primary education, food and livelihood in security, MCHN, women empowerment, early childhood development, community development (VDC) and creation of community volunteers, linkages with LEB and GO Service Providers, Market access, IEG, Cash and Asset transfer issues. The main objective of all these projects were creating Community Resilience against disaster shocks like food and livelihood insecurity, women empowerment, accessing institutional resources, linkages with SERVICE PROVIDERS and complementary to SDG goals for Bangladesh.

SDI has Experience of implementing Food Security and Livelihood (EFSL), Health Hygiene and Nutrition(HHN), WASH, Income & Employment Generation (IEG) and disaster preparedness, Response and Rehabilitation and Climate Change Adaptation Activities.

#### CFW and FFW

CFW/FFW program intervention were made to create immediate food security during the lean periods. Immediate income was generated through FFW or CFW for the distressed members of the extreme poor who lack productive skill. The community were encouraged to identify distressed families and their needs. And encouraged to identify and prioritize, various infrastructures. The interventions were in the form of mostly collective initiatives.

#### Infrastructure development, Linkage with LEB and Market Development

SDI had experience of constructing UP Building in Sarikait union, constructed market sheds with special shed for business women. Also constructed Toilets for business women and 6 community latrines in different unions

#### Comprehensive Homestead Development (CHD)

SDI had under taken CHD programme to address the food security for the vulnerable communities. The CHD scheme includes holding of a series of training for the target beneficiaries followed by supplying of inputs i.e. means of applying the newly acquired vocational skill. The purpose was to enable a food insecure family to earn a sustained income by practicing sustainable crop production and pest management. The families were also made aware of homestead and environmental sanitation, as well as personal hygiene through family approach. The CHD had components like poultry, livestock rearing, beef fattening, milk and derivative

produce, training on net making, dress making, bamboo/cane handicraft, borrow pit or small pond fisheries.

#### MCHN

Improved KAP and family level sensitivity to the high and acute need of nutrition by a lactating mother or a pregnant women and ensuring nutrition with two fold benefits i.e. food security for the mother and ensuring proper mental and motor development of children and access to GO health services and service providers etc.

#### Food distribution and storage management

SDI had experience of targeted food distribution among pregnant as well as lactating mother and child. Had acquired valuable experience of food depot management and logistics and distribution outlet management.

#### Village Development Committees (VDC)

Facilitating formation of Village Development Committees (VDC) and developing a cadre of Community Volunteers [CV (H&N)] and Skilled Birth Attendants (STBAs) to support the VDCs.

#### Climate Change Adaptation (Extension of crop and technology):

SDI organizes extension training involving govt. agricultural extension department and distribute salinity tolerant paddy seeds like BR28 in the Coastal zones of Bangladesh.

#### NURSERY, SOCIAL AND COMMUNITY FORESTRY

SDI motivates and also provide Micro-credit to tree farmers with the multiple objectives like promoting increased green cover and use of tree as wind break for protecting homesteads from cyclonic wind ravages and reducing land erosion.

## PROMOTION OF ENERGY EFFICIENT STOVE (Bondhu Chula), SOLAR PANELS AND SOLAR POWERED LAMPS:

SDI promotes energy efficient stove to facilitate community people getting into the practice of energy efficient, smoke free coking stoves which contributes to reduction energy expenditure and reduction in emission of GHG. Promoting household level use of Solar panel powered source of light or solar lamps and reducing use of kerosene lanterns

#### RAIN WATER HARVESTING:

SDI promotes and help communities to install rain water harvesting and underground water storage units.

#### PROMOTION OF APPROPRIATE TECHNOLOGY:

Pot in Pot vegetable cooler

SDI actively supported R&D (Research & Development) for developing an earthen pot based evaporative cooler for the poor small vegetable vendors in rural markets to lengthen freshness of vegetable by several days; thus relieving the seller from distress sell at throw away price i.e. protecting fare of vegetable commodities.

#### Simple wooden press for producing fuel cake from bio-mass

A simple hand press which can produce compressed fuel cakes from composted biomass. This productive asset can enable a extreme poor to earn an income using waste biomass as raw material for fire wood substitute (fuel cake).

#### Safe Cow fattening done at Dhamrai

The project has been taken to supply safe meat (naturally fattened) to the consumers. The farmers usually fatten cows with an eye to sale these at the Market for muslim religious festival of Eid ul Azha. SDI had provided training on beef fattening, and credit line for the purpose. Traditinal cow fattewning being done using fattening medicines which are harmful for both human and animals as well.

As the consumers are getting aware of the these aspect , the demnad for such animal meat had declined. So the cattle farmers are also adopting methods for safe fattening practices.

SDI is facilitating training and supply of credit and home based cow health services. This has helped the farmers to adopt safe cow fattening practices.

### SDI had Established Vegetable Storage Depot at Dhamrai

Vegetables are grown in Dhamrai Upazila of Dhaka round the year. The farmers of Dhamrai had earned reputation for growing Safe vegetables produced without using toxic chemical fertilizers . But the other challenge being price getting very low and stock of unsold vegetables, when there was supply of more vegetables arriving at the market compared to the demand. There was rotting up of vegetables and farmers become loosers. The farmers were demanding some

measures which could save their produce . SDI had constructed experimentally two vegetable storages at two points in the Dhamrai Upazila with IFADF and PKSF support. One of the storage will hold 8 tons of vegtables while the other one will hold 4 tons. These storages can keep the vegetable fresh for a maximum period pf 30-40 days. Green tomato and Radish can be kept fresh for as long as 60-70 days. Mangoes can be kept fresh for 20-25 days. In these stores there was no use of any chemicals to stop rotting of the vegetbales.

#### Automatic Weather Station at FTC of SDI for Forecasting Climate Information for Farmers

Agriculture is very much dependent of weather. Favorable weather helps more crops. Also by taking preventive measures farmers can minimize loss due to bad weather. The farmers of Dhamarai, specially in and around Sutipara Union are using weather forecast information of SDI's weather station. Farmers are reporting that they could take preventive measures to reduce their loss.

#### SDI Arrnages for Skill Development and Skill Upgradation Training for its Staff

SDI regularly arranages for training of its staff members for the building up their skill and capacitities. So far 55 staff members including Zonal and Branch Managers were trained with the help of DATASOFT Company who had supplied SDI with Micro-credit management software.

#### SDI's PROGRAMMATIC EXPERIENCE

Strength of the SDI in community development and women empowerment, Food Security and Livelihood (EFSL), Health Hygiene and Nutrition (HHN), WASH, Income & Employment Generation (IEG) and Disaster Preparedness, Response, Rehabilitation and Climate Change Adaptation Activities

SDI has been implementing multi sectorial integrated projects, covering adult functional literacy, non-formal primary education, food and livelihood security, MH&N, women empowerment, early childhood development, village development centres (VDC) and creation of community volunteers, linkages with LEB and GO service providers, market access, IEG- Private sector, Cash and Asset transfer programmes. The objective beiengcreating community resilience against disaster shocks like food and livelihood insecurity, women empowerment, accessing institutional resources from serviceproviders thus achieving MDG/SDG goals of Bangladesh. As a partner of SHOUHARDO Program of CARE/USAID/GoB SDI hadexperience of food depot management and logistics and distribution outlet management and experience of targeted food distribution among pregnant as well as lactating mother and child.

#### Experience in managing water and sanitation program

Improvement and facilitation of water and sanitation for the poor is a core program of SDI. Since its inception SDI had implemented projects with Cord Aid Netherlands, AusAid, Australia, DFID (COFCON), OXFAM GB, CARE Bangladesh/USAID, CDSP III and CDSP IV projects sponsored by Govt. of Netherlands and the GoB sponsored

SDI's has several decades' long experience in managing WATSAN programs especially in char areas. SDI hadassisted communities in receiving allocation for DTW from the DPHE; Also 200+ DTWs were installed in Sandwip Uzand in Urirchar of Sandwip and Noakhali, by SDI with its own resources. Community women being trained in the management of a DTW, community management groups were formed for the maintenance and care taking of a DTW; a set of equipment was given to the trained member in a community to do minor maintenance and repairing works. The DTW has remarkably reduced the water collection time thus releasing the time for the women to pursue other productive or self-developmental work. SDI had installed rainwater harvesting units with underground storage units which can supply water collected during the

rainy season for about another other 2-3 months in the dry season. Availability of per capita safe water has impacted on reduction in water borne diseases which had again increased the productive days in a year. In the long run, the availability of safe water hadimproved quality of life.

In the past Hygienic Improved Latrine(HIL) use was low as poor people do not consider this as a basic minimum need.SDI projects donor partners had supported supply of off set pit type hygienic improved latrine to families. The ultra poor families were supplied HIL units at discounted rate. Special credit facilities were extended to families for installing HIL units. The HILwere produced locally. The families who qould installed HIL were given motivation and awareness regarding the benefit of HIL.

Most of the families took HIL of their own free will after becoming convinced of the benefit. Installation of HIL had impacted on the health and nutrition of the family members specially reduction of water borne diseases.

#### HEALTH

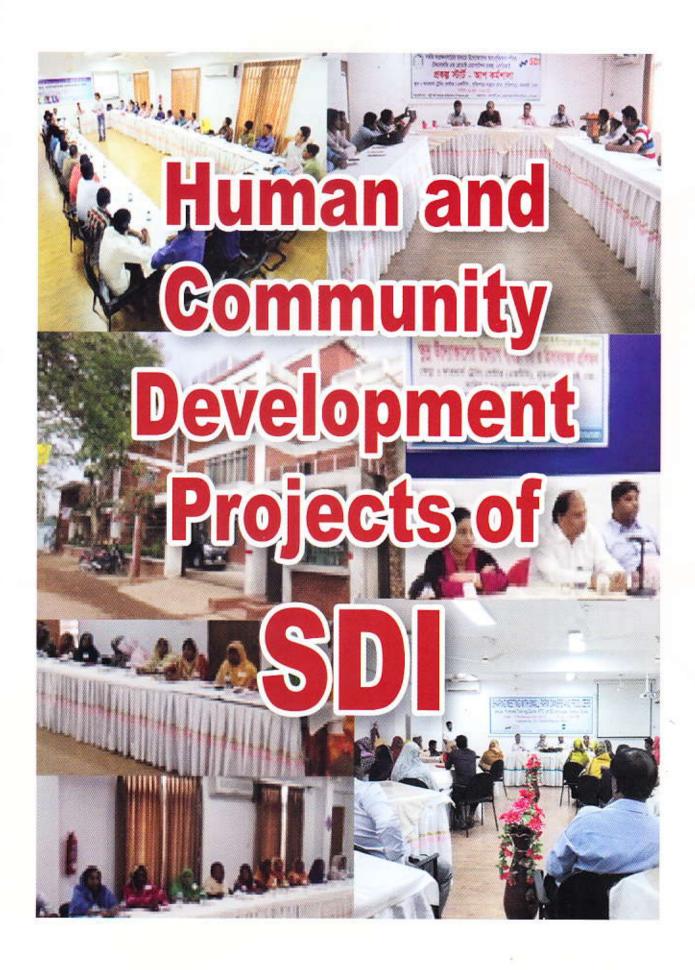

Mother and Child Health and Nutrition (MCHN): Improved KAP and family level sensitivity to the high and acute need of nutrition by a lactating mother or a pregnant women and ensuring nutrition with two fold benefits i.e. food security for the mother and ensuring proper mental and motor development of children and access to GO health services and service providers etc. Skilled Traditional Birth Attendant (STBA): Wherever SDI implements projects, Womens and Child health care interventions is a common program. SDI has trained and employed at least 80 STBAs in peojects areas in Sandwip of Chattagram, SubarnaChar, UrirChar in Noakhali, and Manikganj, Ghior under Manikganj district.

# Farmers Training Centre (FTC) and Integrated Resources Centre(IRC) of SDIat Sutipara, Dhamrai

SDI has established an Integrated Resource Centre at Sutipara of Dhamrai about 45 km west of Dhaka along Dhaka -Aricha highway and 0.25 km along the Sutipara-Nannar road. It is a Modern residential training center for Farmers Improving roductivity thus income of the small landholder farmers is the core objective of this complex. The small farm holders are imparted training in 10 types of farming activities for producing of non toxic crops or vegetables which will bring them higher value addition.

FARMERS TRAINING CENTRE (FTC) and IRCwas constructed by SDI with substantial Japan Grant. The center complex is a 13000 sft. 3 storied building with about 2.60 acres of land for practical training. It has capacity to provide training to 42 trainees in one batch. It has a dormitory facility on the 1st floor for trainees and the trainers as well. On the 2nd floor an auditorium to sit 350 audiences. The complex has a reference library, multimedia, WI-FI, a standby generator. The FTC is providing training to the farmers (specially the small farmers) to increase productivity using modern Agr.knowhow. Promote CCA focused agriculture and non-toxic edible crops. Besides this other external organization/institutions hire FTC training venue and facilities to conduct their own trainings.

Fully air-conditioned main training hall can accommodate a maximum number of 50 trainees, equipped with state of the art AV. Air-conditioned dining hall with large screen TV for serving 48 persons at a time.

- The stair case of the building has ramp for use by physically challenged persons.
- On the 1st floor there is trainee accommodation for 30 trainees.
- 3 air-conditioned rooms on 1st floor for the resources persons and guest and a dining room for them.
- Air-conditioned auditorium for 400 audience on 2nd floor, equipped with state of the art AV systems and refreshment areas and, it has a separate waiting room with attached amenities for special guests.
- · The wide roof top to hold open air programmes.
- · The training complex has a reference library,
- · For uninterrupted power supply the complex has its own standby generator.

- All rooms are connected by intercom and WiFi services for trainees and trainers. Campus is
  protected by CCTVmonitoring and highly professional security personnel's guard the campus.
- The center has Admin &Logistics, Reception, Laundry, Driver resting/accommodation, Sick room, car park for 4 vehicles etc.
- Agricultural Demo andSeed Store: The training center has demonstration rooms for agricultural tools and machineries and seeds and organic manures etc.
- A qualified MAT and a qualified Nurse are present to address the health and medicare need of the trainees.

#### Training Resource persons and equipments:

The FTC has its own full time staff trainers and also has a panel of trainers drawn from officials of the department of livestock and fisheries and agriculture of the GoB and Universities. The training center is equipped with all the latest technologies required for a modern training center. Computers, Laser printers, MM projectors (2 units), Audio system with wireless microphones, Display Boards, White Board, Flip Boards and all other standard equipments are available in the training center.

Hands on training facilities:

**Demonstration Plot:** For hands on training, adjacent to the main campus, the training center has a land space of 2.12 acres area for poultry and livestock sheds, seed beds and rice beds and vegetable crops. There is a pond for fisheries related trainings and recreational boating purposes. There is an open thatched house for holding group discussions.

Pond: For fisheries related training activities. The pond has a boat for recreational purposes.

**Thatched Shed:** A thatched shed in the demonstration plot is an ideal setting for holding open space consultation and group discussion etc.

Dormitory for 30 trainees including women trainees. On 1st floor accommodations for 4 trainers' with attached bath and geezers and 2 Air-conditioned rooms for special guests, and a dining room for the guests on the same floor.

The centre has a spacious seminar cum auditorium ideal for holding conference 400 audiences. The venue is ideal for holding conferences by Govt. agencies, NGOs, MFIs, multinational companies etc. The conference centre is fully air conditioned and equipped with state of the art audio-visual systems and acoustically designed for crisp and clear sound and suppress noises. Adjacent of the conference hall is a spacious area for refreshment arrangements. Also it has an air -conditioned waiting lounge for special guests. The roof of the building has an open space of 2500 sft, ideal for holding openair cultural events.

#### SAMRIDDI

Enhancing Resources and Increasing Capacities of Poor Households Towards Elimination of their Poverty (ENRICH) Program of SDI in Harishpur Union, Sandwip Upazila and Baniajuri Union, Ghior UZ

ENRICH is a human-centered holistic development approach. It is an integrated approach. The overall vision of ENRICH is to work with the poor, to create a humanly dignified living standards and they enjoy universal human rights. ENRICH focuses on components such as education, health, nutrition and employment generation, youth development, beggar rehabilitation etc.

Health program: Under the health program, a ENRICH Health Officers (EHO) and Health Visitors are working and visiting households, holding Static clinic and satellite clinic and health camps.

**Education program:** Education centers are helping students to prepare their daily lessons given by their schools.

Youth in Development program: The 'Youth in Development' program has been started from FY 2016-17. Youths who have received training on 'Self-realization and leadership development have already undertaken various social activities such as construction of roads, social awareness against child marriage, campaign against drugs, tying pots on trees as accommodation for birds nest etc.

**Beggar rehabilitation:** Beggars have been rehabilitated in ENRICH Unions of Sanwip and Ghior. The rehabilitation program is being implemented by donating BDT 1 Lakh to each beggar through bank account for investing in IGA.

ENRICH center and ENRICH-ed home: ENRICH-ed centres have been constructed in ENRICH unions. Moreover ENRICH-ed home has also been developed in these unions, where components such as health, education, income, environment and livelihood improvement are present.

'Bandhuchula' and solar activities: Bandhuchula (environment friendly cooking stoves) and solar home system has been provided to households.

#### **Special Savings Program:**

Under the 'Special Savings Program' of ENRICH, upto March' 18, members of families either headed by female members or families with handicapped members have successfully completed 2 years duration of savings. As per the guidelines of this program matching grant were given to them.

Community-based Development Program: Furniture were given to the ENRICH centers. Also WSL latrines and tube wells were installed at ENRICH centers.

SAMRIDDI aims at Estbalsih the Human Dignity by Ensuring Basic Rights of all the people in a sociaety. Under this project the following activites being implemented:

Centre for coaching in the afternoon: 44 such centres were opened for helping children belong to poor families prepare their school education.

Health Care Service: 3 static were set up in 3 offcies and 32 satellite clinics were operated in the project area. In each clinic health care services were given for 16 days.

Rehabilitation of beggars -13 beggars were rehabilitated .Each of the former beggars were given a milch cow and cow shade construction cost supported by the project. The value of which is about tk 1lac for each bagger family.

Ensuring safe water for all purposes: DTW and STW being installed and also WSL were given to the poor families.

Estbalishment of model household: An ideal household is sucha household, in which members use safe water. The hh has sanitary latrine and has proper hand washing facilites after defecation. The members being registered in Health card and also the memebrs possess health insurence. The household may have orchards of fruit and or medicianl plants and timber trees etc. There might have ponds with fishes and some families may keep goats on raised platforms. They may keep pigeons, chikens etc. some of the families may produce vermi-compose for own use as well as for selling to the neighbours. Some households may

cultivate vegetables and or flowers. 30 families have been considered ADARSHA Households. SDI has given these households special credit line, technical support, besides orientation and training.

**Establihment of SAMRDDI Centre:** SDI had facilitated estbalishment 9 SAMRIDDI centres having recreatinal facilities for the community people meet.

Special Saving Programme: This component targets widow, phyically handicapped, women led h/h, hardcore poor families. Under this cscheme for a period of 2 years the members would deposit weekly savings. Against this saving the project will contribute equal amount to up the savers account. After two years thesavers will receive twice the amount of her savings to start some ventures of her own.

Youth activities is also involved in ENRICH Baniajuri.

# REE-CALL REE-CALL: Creating Resilient Communities in Sandwip

SDI is implementing RECALL-2021 project in 4 unions of Sandwip namely Azimpur, Musapur, Kalapania and Rahmatpur unions. The objective of the project being enabling communities to become resilient in the wake of climate change driven economic shocks. The project facilitates development of Transforamtive Women Leadership, who can take charge of their communities' development agenda. One of the key strategy of the project is facilitaitng organization of Community Based Organization (CBO). The project involves the CBOs in developing linkages with the Local Government and the Union Porishods to pull resources. The project had fostered formation of 30 resilient communities led by 30 CBOs. Trained 252 volunteeres to help communites to get preapred for a natural disaster situation and the volunteers were also trained to respond in post disaster situations. The project had conducted advocacy for construction or reconstruction and repairing of Flood protective embankments. As a result of which 11 km long stretch of polder had been constructed. 400 women and men were trained as Change Makers to work for prevention of VAW. Women were given skill for conducting negotiation in the market place. 3791 women had started various IEG activities and increased their family income. 7 villages had been brought under 100% resilient WASH sanitation and WSL coverage. Food banks were established. These food bank collects 2118 kiligram of rice per month.

**REECALL PROJECT:** This project is being implemented in Sandwip with OXFAM GB partnership. The project has program activities which supports women's empowerment.

#### **WASH activities:**

Bathing Cubical at community level: 9 cubical baths with a tube-well head being installed in 9 community for the women and adolescent girl to take bath in privacy and practice personal hygiene

Training of school teacher on skill of WASH Promotion: The teachers and the members of the management committees of 6 High schools were imparted WASH training on safe water, Sanitation and Hygiene for dissemination among the students.

Child to child(C 2 C) hygiene campaigns: 30 Child to child (C 2 C) groups conducted C2C campaigns on identifying households with open latrine and unhygienic latrines. They hold rallies and disseminated WASH messages about safe water, sanitary-latrines, proper hand washing, and Family level hygienic practice. 30 Child to Child hygiene campaigns were conducted and total 582 children had participated where physically challenged 8 boys and 6 girls had attended.

Students trained on skill of inclusive WASH promotion: The trained students conducting inclusive WASH promotion campaign

**Leaflets/posters:** Distribution of leaflets on hand washing.

Distribution of hand washing device/facility to extreme poor family: Hand washing devises like plastic water bucket with lid, 1 plastic bowl, 1 stool (plastic) and 1 soap case provided to 710 households.

**National Sanitation and Hand Washing Day Observation:** 4 Hand-washing campaigns were conducted in 4 unions and demonstrated the proper methods of washing hands. This had heightened awareness of the importance of washing both hands properly, after visiting toilet or before touching food while taking meals.

**Women WASH Platform (WWP) formed and mobilised:** 30WWP were formed in 30 CBOs. Hygiene issues like hand washing, use of hygienic latrine, safe water, personal hygiene practice, hygienic food practice, hygienic environment being discussed in the meetings. IEC materials (flash card) were used for awareness session. WWP identified the unhygienic latrine and took initiatives to replace these with hygienic latrines with UP support and households own contribution.

**CBO women member trained on WWP and WASH:** 60 members of the Women Wash Platform (WWP) sensitized about the WASH situation in the villages/communities and disseminated the awareness about closing open pit latrines and replacing with Hygienic Improved Latrine, use of safe water and hand washing techniques etc.

WASH care giver developed for dealing with disability: The trained care givers for the physically challenged members in their own families and disseminate knowledge and skills in the community. They also sensitize the people about the need for dignified behavior to differentlyabled people.

Ward and Union level WATSAN committee reformed/reactivated: The WWP work with Ward and Union level WATSAN committees, the local CBO and WWP in stopping practice of defecation in the open, proper method of collecting water from a tubewell and hygienic food /water storage.

**UP level WATSAN committee:** 4 Union Sanitation Task Forces (USTF) were formed in 4 unions to reinforce the national agenda of 100% sanitation in the villages.

Ward level WATSAN committee: 21 WSTFs in 21 wards in 4 unions held meetings. Meetings also attended by the CBO leaders to review of the prevailing sanitation situation and how to improve this. The LEB Ward members had co opted the CBOs for identifying eligible families for allotment of Hygienic Improved Latrine units from DPHE, GoB.

#### **Buffalo Development Value Chain Project (Sandwip and Urirchar):**

SDI is implementing a value chain project with the financial support of PKSF in the coastal charland area (Sandwip and Urirchar) toincreases income of the entrepreneurs by increasing production of buffalo". At Sandwip and Urirchar 2100 entrepreneurs owners of about 13500 buffalo are the participants of the project. The project was launched on 15 October 2018. The projects' aim is to achieve three objectives as follows:

- a. Increased productivity of buffalo.
- b. Mortality rate of buffalo decreased.
- c. Income of buffalo entrepreneurs increased.

#### Activities were taken in broader head as follows:

1. Providing de-worming tablet for buffalo through deworming campaign, 2. Vaccination support through vaccination campaign, 3. Provide different skill development training to buffalo value chain development entrepreneurs, 4. Arrange workshop with different stakeholders, 5. Provide 10 improved variety bull buffalo to 10 potential entrepreneurs for improvement of cross breeding, 6. Promotion of Local Service Provider (LSP) for Artificial Insemination (AI), 7. Provide support to Entrepreneurs for establishment of demonstration plot for production of improved variety green grass, 8. Provide technical support to launch buffalo feed technology demonstration, 9. Credit/loan support for scale up of buffalo value chain entrepreneurship.

# JAGORON : A credit instrument to initiate household based enterprise development

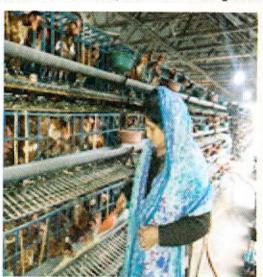

'Jagoron'is a credit instrument of SDI/PKSF to initiate household based enterprise development. Under this programme, borrowers being encouraged to undertake family-based income generating activities. Funds being made available with least conventional formalities in the rural areas. In urban area, woman participation in Jagoron is higher in comparison to its rural counterpart and since they have higher participation in the labour market, larger access to material resources, greater mobility and meaningful role in the household decision-making process. Urban borrowers are distinct from the rural borrowers in a number of ways. They are the landless squatters and they usually take loan for small trading. Vulnerable to threats of eviction, they live in slums or makeshift shacks.

# AGRASOR : A Programme for Enterprise Development

AGRASOR Programme jointly financed by PKSF and IFAD, is aimed at expediting poverty reduction through the expansion of farm and non-farm microenterprises. Any business activity that has investment up to BDT 1.5 million (excluding land and building) is considered as microenterprise. An individual micro-entrepreneur can take loan up to BDT 1.0 million for his enterprise under the Agrosor

Program.

Under the financial services for microenterprises component of the project, micro entrepreneurs are receiving financial services. They are using their loan for various enterprises of trade, farming, processing and service sectors. Different proven technologies were transferred to the partners. Agricultural technologies like artificial insemination for improving cow breed, sex pheromone trap technology and other bio technologies for producing safe vegetables, perch method technology for goat rearing, prawn and carp fish mixed culture technologies, high value fruit cultivation technologies were extended to increase productivity of the respective sub-sectors.

# SUFOLON: A programme to promote agriculture and livestock

SDI with PKSF support launched Seasonal Loan (now known as Sufolon) programme in the year 2006. This programme offers flexibilities and has become a prominent core programme of SDI. This unique loan product has created tremendous impetus for the investment of different IGAs such as crop cultivation and processing, livestock, fisheries, agro-forestry agro-processing etc. The provision of the loan repayment in a single installment after the sale of the product has made it very popular among the borrowers.

Sufolon offers comprehensive training program for the farmers and staff of the MFIs to develop their capacity in agricultural lending. To improve Sufolon program, attention being given to research, development of high-yielding seed, management of irrigation, mechanized and technology-based farming, and vocational education to produce skilled human resources and increased productivity.

# BUNIAD: Including the Excluded for Ensuring Human Dignity

The objective of Buniad is to support the ultra-poor people in such a way so that they become capable to create sustainable income opportunities and can lift out of extreme povertyand achieve human dignity as well as.SDI with support from PKSF has been implementing 'Buniad' since 2004 previously known as Ultra Poor Program (UPP). The biggest challenge that the ultra poor face is the lack of a consistent income. Through 'Buniad', SDI/PKSF is providing financial support for IGA of the ultra poor with lower service charge and considerable flexibilities. This had enabled ultra poor members to do sharecropping, small enterprise, food processing, tailoring and other IGA, giving them secured income and improved livelihood.

# 'Buniad' targets the following category of the ultra poor population:

- Have less than or equal to 10 decimals of land. Earn livelihood through selling their labor.
   Households face severe food crisis in especially in the lean period
- Households with no permanent residence(e.g. slum-dwellers), live in and around areas affected by river erosion, live besides dam, Beggars, mobile sex workers, domestic help.
- Female headed households dependent on others assistance. Widowed, divorced, abandoned and distressed women. Old, physically challenged people and acid burnt women who have no permanent source of income.
- Households dependent on child labor.

SDI is providing flexible microcredit to the ultra-poor people. In addition to the financial service SDI/PKSFis also providing different non-financial services like primary health care, technical services for implementing IGA, capacity building support to cope with disaster, training, awareness building on nutrition and social

issues through some special projects. Under 'Buniad' flexibilities have been given to the ultra-poor borrowers for savings deposit, withdrawal of savings, loan repayment, attendance in group meetings and minimum savings requirement for a fresh loan.SDI provides Land Lease loan for the ultra-poor people under 'Buniad'. Through the Land Lease Loan program the Ultra Poor Households (UHH) of char areas and engaged in agriculture, can take lease of cultivable land for

crop cultivation thus creates opportunities to improve their livelihood. SDI also provides Disaster management loan to the ultra poor borrowers to offset the impact of natural and manmade disaster.

### Main Features of 'Buniad':

| Component                         | Features  |  |  |  |  |  |  |  |  |
|-----------------------------------|---|--|--|--|--|--|--|--|--|
| Savings                           | Mandatory regular but flexible savings. Can withdraw their own savings. SDI provide interest on their savings as per MRA policy.  |  |  |  |  |  |  |  |  |
| Group meeting                     | andatoryGroup meetings with frequency of meeting decided bythe group members.   |  |  |  |  |  |  |  |  |
| Size of loan                      | 1st Year –Max.loan TK. 10,000/ The 2nd and subsequent loans will be sanctioned considering the type of the IGA, capacity of using the first loan and repayment of the first loan  |  |  |  |  |  |  |  |  |
| Duration and mode of<br>repayment | The ultra poor borrowers have to repaythe loan within one year bynstallments (weekly/fortnightly/monthly).  |  |  |  |  |  |  |  |  |
| Service charge (rate)             | The rate of service charge is 20% (on declining balance).   |  |  |  |  |  |  |  |  |
| Transaction costof<br>borrowers   | The ultra poor people do not have to pay for passbook, membership form, other charges related to loan applicationDo not have to deposit any amount against their sanctioned loan. |  |  |  |  |  |  |  |  |

#### PACE PROJECT

N.

SDI launched had launched Promoting Agricultural Commercialization and Enterprises (PACE) project in January 2015 with PKSF support. This is an IFAD funded project. Entrepreneurs are receiving financial and non-financial technical services and support. Apart from providing financial services to the micro entrepreneurs, the project is making value chain interventions and extending technological supports for the development of various potential economic sub sectors.

The "PACE" Project has been designed on the basis of the experience and learning of the past projects. The PACE Project had adopted the strategy of combining financial and non-financial services to expedite the process of poverty reduction.PACE project is being implemented by SDI in all its footprint areas. The main benefits of the project will increase in enhancement in productivity due to adoption of technologies and management practices, increased income by microentrepreneurs and other Value Chain actors, increased skills levels of workers, sustainable services,

| The specific challenges  | Interventions required  |  |  |  |  |  |
|--|---|--|--|--|--|--|
| <ul> <li>Market linkage,</li> <li>Cluster farming,</li> <li>Cold storage,</li> <li>Outlet for safe food</li> <li>Consumer awareness</li> </ul> | Awareness raising and provide training in appropriate skill and also health hazard  Consumer awareness on healthy food  PACE cluster farming  Establish Outlet for safe food  Ensure availably of technology  Cool chain and marketing appropriate fund |  |  |  |  |  |

Goal and Objectives: The project goal is sustainable enhancement of livelihoods (higher income from self-employment, business profit and wage employment, and food security) of the moderate and extreme poor (men and women). The development objectives are to increase sales and incomes from existing and new microenterprises and to create new wage employment opportunities for extreme and moderate poor people.

**Project Participants:** The target population of PACE project include microentrepreneurs, who are borrowers of ME loan program, moderately poor and extremely poor persons. In terms of professional identities, the project target marginal and small farmers involved in

field crops, horticulture, fisheries, livestock production, non-farm micro-entrepreneurs, and professionals in service sectors.

Value chain activities (farm or non-farm) of SDI: Due to value chain intervention beneficiary get benefits of selling their products at a fair price compared to traditional sales in the market. Since from 2012, under value chain activities SDI had started its pesticide free VEGETABLE and MORINGA production and marketing. The initiative is still continuing and expanded to cover more areas and beneficiaries (land 1800 acre).

Integrated Pest Management (IPM) increases crop yield and decreases the production cost offering more profit for the farmers. Very importantly, integrated pest management (IPM) is environment-friendly and provides harmful toxin free vegetable for consumption. Besides such vegetables has national and international market demand.

**SDI strength:** - SDI has 9 years practical experience on value chain activities and has base line survey on Value

SDI has established / developed its linkage with relevant GO and NGOs sector.

Constraints to commercialize value chains: Consumer awareness is low or no awareness about source of safe food both farm and non-farm. One of constraints is establishing linkage with the up-end market like super shops in metropolitan markets and foreign market abroad. Facilities for preservation of food storage is not available nearer to the farmers.

#### SDI's requirements for commercialization of its value chain products

- Build up awareness of the farmers and consumers about safe food production and marketing,
- To capacity buildup of farmers on safe food production and marketing,
- Develop appropriate Linkage among supply chain actors both in country and abroad Establish SDI's own outlet near
- Promotion of safe food in Print and electronic media'
- To initiate cluster farming and contract farming approach.
- Availability technologies and equipment's and fund

#### SDI main achievements in PACE activities

| Activities                 | Achievement/success (e.g. beneficiaries, commercialization, scale etc.)   |  |  |  |  |  |  |  |  |
|----------------------------|---|--|--|--|--|--|--|--|--|
| Value chain<br>development | <ul> <li>3000 beneficiaries trained on safe food production and marketin</li> <li>1800 acre land are under safe vegetable production</li> <li>Production cost reduced</li> <li>Damage of vegetables reduced</li> <li>Farmers getting additional price fotheir produce</li> <li>Social recognition</li> </ul>    |  |  |  |  |  |  |  |  |
| Technology<br>adaptation   | <ul> <li>Integrated Pest Management (IPM) for production safe vegetables.</li> <li>Farmers had gradually adapted appropriate technologies</li> <li>SDI provide separate Agriculture loan</li> <li>Enterprise loan is also another loanfor commercialization of product and involved out side workers</li> </ul> |  |  |  |  |  |  |  |  |

# SDI's capacity to scale up and/or replicate PACE activity (ies)

SDI has capacity to scale up and replicate the PACE Activities in the districts of Dhaka, Manikganj, Tangail, Gazipur, Cox'sBazar,Noakhali in particular. SDI has already forged linkages with the Department of Agriculture (DAE), Agriculture officer and Agriculture Extension office(AEO), Ispahani Biotech. Abul Bashar Agriculture College and stakeholders like Seed Suppliers, such ACI, LALTEER, Metal, BRAC, BADC, Pesticide producers and dealers.

In a second phase of PACE programme, SDI is putting emphasize on cooling chain and marketing support, Insurance, Lab facilities, monitoring and base line survey and evaluation.

#### NUTRITION:

### Key nutrition project or activity implemented by the SDI.

|   | Experience in Nutrition  |
|---|--|
| Project   | Sustainable Agriculture, Food Security and Linkages (SaFaL)<br>Project   |
| To increase income and job employment through harm full pesticide free vegetable and Moringa production and marketing | <ul> <li>To increase income(safe vegetable)</li> <li>Aware on nutrition value</li> <li>Train farmers to produce safe vegetable and health benefit.</li> <li>Training, Monitoring, court yard meeting on safe food and nutrition</li> <li>Linkage with Directorate of Agriculture (DAE) and Local Institutions</li> </ul> |

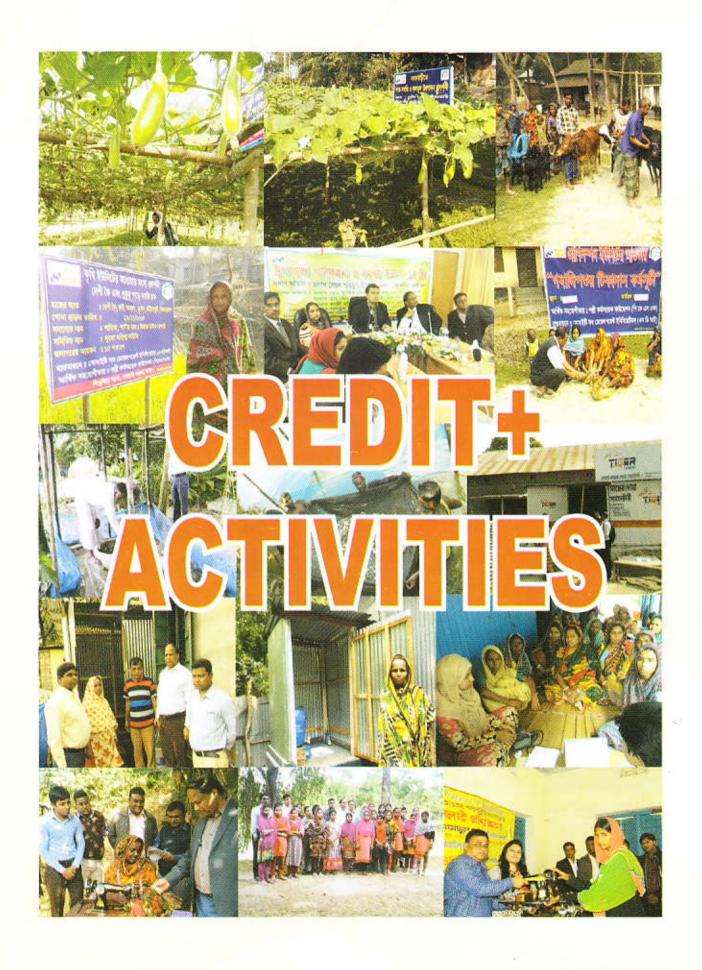

The main nutrition problems in working areas: Due to poverty, the farmer families cannot afford balance diet. They have lack knowledge and awareness about nutrition value, safe food and safe food processing. However due to the projects interventions, balanced food intake is increasing.

Linkages between SDI's general nutrition programme activities viz a viz PACE funded activities?

Project staff, credit officer, Farmer and others field staff play a significant role to develop awareness of the farmer and their family members on safe food and nutrition at household level. However, they need some initial and refresher trainings and regular information feed update.

#### Opportunities for nutrition in PACE

- Some-capacity building program on safe food, food cocking, food processing and nutrition.
- Publication of some extension materials such as Brochure, Booklet, Leaflet, Folder, Chart, flash card, poster, video clips etc.
- House visit, Group meeting and staff meeting, monitoringon nutritional activities.
- Arrange competitions among safe vegetable farmers and awarding of certificates and cash incentives etc.

# **Agriculture Unit**

SDI with PKSF support established AU as its mainstream program in 2013. The purpose of this unit is to extend sustainable agricultural technology and capacity building supports to the door-steps of farmers with a view to increasing farming productivity and ensuring food security of the country. This Unit enables the farmer to gain access to resources necessary for boosting crop production. Accordingly, AU has designed its implementation strategy for crops sub-sector.

#### Objectives of this Unit are

- to provide useful, modern and environment-friendly agricultural technologies;
- to establish market linkages of agricultural commodities;
- to develop skilled manpower on farming technology at SDI and farmer level and
- to assist in providing microfinance services

#### The major activities of this Unit are:

- Introducing high value, high yielding, and climate resilient crop varieties;
- Conducting cluster-based demonstrations on proven profitable crop technologies;
- · Introducing Good Agriculture Practices (GAP) at field level for better crop production;
- Introducing safe crop cultivation practices (by using bio fertilizer and adopting bio control for pest management etc.);
- Promoting season-wise diversified crop cultivation with suitable cropping pattern;
- Enhancing homestead gardening for proper land utilization, ensuring nutritional security of farming community and additional income;
- Enhancing knowledge, skills and awareness of farmers as well as staffs of SDI through training, exposure visit, motivation etc.
- Conducting field days for effective dissemination of technology and effective crop production techniques.
- Operating 'Agriculture Counseling Center' for speedy solution of field level crop related problems.

#### Achievement of Agriculture Unit:

#### **Technology Demonstration**

AU has also provided USG applicators and pheromone lures (for pheromone trap) to the farmers, provided households with vegetable seed. For learning and sharing of the best practices of crop cultivation. Exposure visits have been arranged. Upazilla Planning Meetings and Agriculture Counselling meetings have also been arranged.

#### Capacity Building and Training

For effective expansion of new technologies farmers were trained on crop production with the help of resource persons from Department of Agricultural Extension (DAE), Bangladesh Agriculture Research Institute (BARI), Bangladesh Agriculture Development Corporation (BADC) etc. Members were also trained on specialized farming activities at SDI's own training centre FTC at Sutipara, Dhamrai. AU also trained agriculture officers of SDI on different improved technology.

# Fisheries and Livestock (FLU) Unit

Poverty alleviation through sustainable development programmes for the poor and ultra-poor with appropriate financial services is the main motto of SDI. The Unit aims to ensure sustainable aquaculture and livestock production through financial and technical support, skill development and quality assurance. Under FLU, there are two different cells namely, Fisheries Cell (FC) and Livestock Cell (LC).

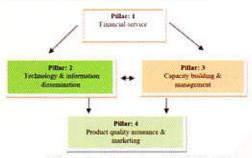

Fig.: 1 - Strategic Framework of PKSF's FLU

#### **FLU** activities:

Technology demonstration: Good housing practices, effective feeding system, ensuring animal comfort, preventive veterinary care, timely and breeding and environment-friendly waste management are the pre-requisites to sustainable and profitable livestock production. Appropriate technologies are demonstrated to the farmers in order to ensure profitability of fisheries and livestock-related IGAs. Cost effective Good Aquaculture Practices (GAP) demonstrated for sustainable commercial fish production in manner.

Livestock Technologies: Improved technologies demonstrated under the LC include semi-intensive, intensive dairying, beef fattening, vermi-compost production, buck rearing, broiler rearing, layer rearing, sonali chicken rearing, duck rearing, fodder production, improved steer cattle fattening, beef cattle development through Brahma crossbred cattle rearing programme, buffalo rearing. Partner members are being provided with appropriate financial services, technical advice and farming inputs such as breeding animal, day old chicks, fodder cutting/saplings, housing design, anthelmintics, vaccines, disinfectant etc.

**Distribution of vaccines, anthelmintics & kit:** The LC has conducted vaccination program against the FMD, Anthrax, PPR, Newcastle Disease, and Duck Plague Disease, and also provided broad spectrum anthelmintics. The FLU of PKSF had provided veterinary kits to the technical staff of the SDI to ensure preventive and curative veterinary services at members' door-steps.

Fisheries Technologies: The FC has implemented different fish production technologies such as carp-mola mixed culture, crap fattening, high value fishes like native shing, magur, tengra, pabda, gulsa and baim fish culture, carp-prawn polyculture, Vietnam koi culture, eel fish culture and fattening and fish culture in cages. Besides, it has also introduced vegetable cultivation on pond embankment/dike, nursery pond rearer etc. The FC has also introduced cluster-based kuchia farming and high value native fish culture.

#### Capacity building under the FLU

**Farmers' training:** Under the FLU, members had received training on different fisheries and livestock technologies. Besides, the livestock and poultry service providers' members were trained.

**Training & Exposure visit:** The FLU of PKSF had organized exposure visits to successful demonstrations of livestock technologies. SDI staff had received training on 'Good Aquaculture Practices (GAP)' at Bangladesh Fisheries Research Institute (BFRI).

#### SANITATION PROJECTs of SDI

Good sanitation is vital for good health and for wealth creation as well. According to the report of the Joint Monitoring Program (JMP) 2015, the current prevalence of improved sanitation is 61 percent. Hygienic latrines are considered the next generation of toilets, fully confining waste. This project has been initiated by World Bank in partnership with PKSF. The project aims at replacing exiting toilets which are mostly unscientific and unhygienic. The project was launched for extension of programmatic technical support torural sanitation services. It has two agenda 1) Development of advanced sanitation products and market extension 2) Increasing access for poor to advanced sanitation services and facilities. Many households (specially the poor) in the rural areas of Bangladesh don't have cash in hand to upgrade sanitation systems, but can afford the cost if they are able to spread the cost over time. SDI in partnership with PKSF has decided to adjust a demand led strategy for promoting expansion of hygienic toilets by using lending instrument.

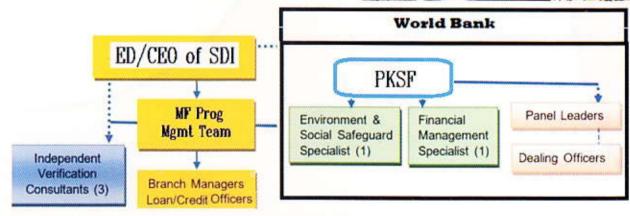

Figure-3: PMU structure of OBA Sanitation Microfinance Program

#### The key objectives being

Development of Local Sanitation Entrepreneurs (LES)to produce and supply consumer specific different designs and price ranges and creating demand for advanced sanitation products.

The specific objective being,

Sanitation credit programme(product) tailored to the need of the entrepreneurs and the consumers and

Bringing to the door steps of the extreme poor 'poor specific' snaitation services.

SDI is a partner of PKSF to implement OBA project.SDI had identified potential manufacturers of sanitation devises, Village Sanitation Centre (VSC) project of World Bankhad arranged for skill and production training and transfer of know how.

SDI had created two credit lines one for the entrepreneurs and another for the consumers. The entrepreneurs who had received training on advanced latrine production were eligible to receive credit from SDI under 'AGRASHAR" category. SDI had extended credit line to the SCs.

SDI had extended interest free maximum credit of taka 10,000 to households for installing a new toilet or for partial replacement of an existing toilet with toilet of improved design. The project gives households to make a choice from 2 designs. Namely 'ARAM' and "BILASH'. The specialty of the design is that these are offsettype latrines. SDI branch offices issues interest free credit to a purchaser of a latrine. At present, SDI is implementing this project in its activity areas through its branch offices. The staff of SDI like Focal Persons, Area and Branch Managers and Credit Officers being actively involved for the field level operations of OBA Sanitation Microfinance Program.

The manufacturers can easily produce the platform of the ARAM type larine, the buyers can bring it home and engage experienced labourer to construct the platform. The 'ARAM' type latrine cost in the range of Tk. 2,600 to Tk.7,000. But for installing "BILASH' type toilet the platform need to be constructed by a masons engaged by the platform seller. The cost of BILASH type toilet is in therange of taka 5000 to 10,000.

Under the OBA Sanitation Microfinance Project, hygienic latrines being installed bypoor households. Majority of the borrowers of SDI being women.

The component will provide subsidies to improve access to on-site sanitation for low-income households. The one-off OBA subsidy being made available for household loans for low-cost technologies pricing between BDT 3500 and BDT 10,000. The OBA subsidy is in the range from 10 to 12.5 percent of the total value of loan.

3549 borrowers had installed ARAM, ARAM +BILASH type latrines. They had received maximum amount of loans of Tk 10,000 per family for installing safe latrines

During the reporting period (a) 3549poor households had received sanitation loans from The total fund of the SDIs OBA project was Tk 30 Tk. million. Of this, the PKSF/World Bank had financed Tk. 15 million.

#### Loan disbursement to Local Entrepreneurs (LEs):

Up to April, 2018, 40 Local Entrepreneurs (LEs) had received training conducted by the World Bank Technical Assistance (TA) team on the construction of hygienic latrines. The LEs had received credit from SDI for expansion of their business. Now, majority of them are able to provide better service through skilled masons and carpenters along with a one stop shop where all materials for latrines construction including pit, platform and superstructure are available.

During February 10-15, 2018, the World Bank team carried out an Implementation Support Review Mission of the OBA Sanitation Microfinance Program' Project.

#### **OBA** Sanitation Development Programme

The one year duration project has been initiaited in July 2017 with WorldBanks (WB) financial and technical support. The project has been implemented in 238 villages in 9 upazilas of Dhaka and Manikganj.21 local sanitary product entrepeneurswere trained by WB designated trainers on skill of production of different components of sanitary latrines of 2 types of latrines i.e. (a) BILASH (2) BILASH Box. At the time of reporting 17 entrepreneurs has already started production of latriens of these two types. Also SDI had initiated program of giving incentives, credit line on easy term of repayments for installation of these types of latrines. Also members being given training on latrine use and management. Till the time of reporting

3513 units have been installed. Of these 1490 and 2023 units being BILASH and BILASH box type. The program includes families who are not members of SDIs different projects/programs. The entrepreneurs are continuing to produce safe lartiens even though the project had ended.

# Skills for Employment Investment Program (SEIP)

Project Background: The Finance Division of Ministry of Finance, Government of Bangladesh (GoB) has established 'Skill Development Coordination and Monitoring Unit' (SDCMU) to execute the Skills for Employment Investment Program (SEIP) project. Asian Development Bank, Government of Bangladesh and Swiss Agency for Development and Cooperation (SDC) are jointly financing the project. PKSF had been implementing the project. The project aims at create skilled and semi-skilled workers under six priority sectors. At least 70% of the total trainees will be employed after training. The training project is expected to increase income of the trainee's households by at least 20% income. The project will ensure demand driven skill-based training of the poor with a view to create wage and self employment.

PKSF-SEIP project is aimed to provide training to youths of low income families through selected Training Institutions (TIs). Thus, during the period of December 2015 to June 2016, two thousand four hundred and thirty six (2436) participants (Male: Female 81:19) their skills started development trainings (Three and Six months courses) based on selected trades. As on December 2016, three thousand one hundred and twenty eight (3128) trainees have completed their training

successfully and one thousand seven hundred and ten (1710) of them have been placed into employment during December 2015 to December 2016.

One of the major objectives of SEIP project is Industrydemand driven workforce development. Project Management Unit (PMU) had organized two major workshops on the topics of 'Job Placement' and maintaining proper 'Finance & Accounts guideline' foreffective implementation of the project. PKSF had organized several meetings, seminars, workshops and other programs.

The goal of the project is to develop skilled workforce through skills training and therefore placing them in productive self and wage employment which will improve their sustainable livelihood.

#### The objectives of the SEIP project are;

- Increase access for targeted poor (both male and female) people to market responsive skills development training programs;
- Impart skills training linked to gainful wage or self employment.
- Ensure job placement thus increase income of the trained trainees.

SEIP entails three major tasks viz.; selection of appropriate trainees, selection of renowned and efficient training institutes and job placement of the passed out trainees.

- Selection of Appropriate Trainees: SDI and PKSF had jointly selected the trainees from their organized group members under inclusive financing program. Trainees' selection will be finalized after conducting screening tests. Trainee of age 15+ being selected. The projecthad borne all expenditures of trainees except only 10% of the accommodation and food cost. Initiatives will be taken to encourage participation of the people with disabilities, ethnic minority and female trainees.
- Selection of Qualified Training Institutes: PKSF had identified training institutes and ensured delivery of standard courses.
- Job Placement: PKSF will ensure job placement of the trainees within 6 months of each training program. Training institutes had assisted to ensure job placements. The job placement services will ensure the following: i) preparing database of the relevant industries; ii) developing linkages with the employers; iii) organizing job fair iv) identifying job vacancies and preparing trainees for interviews; and vii) assisting the implementation of Trainees Tracking System.

SDI had gained valuable experience on reduction of the multi-dimensional poverty in Bangladesh. SDI believe that combined with effective policies and markets could trigger faster rates of economic growth and human development. SDI understand that human resource plays a vital role in the knowledge economy and working population. However, the upgrading of skill based labor is one of the major challenge for the low skilled workers in Bangladesh, as they are being unable to adjust their skills according to the market demand. In this context, SDI is implementing the 'Skills for Employment Investment Program (SEIP)'project. SDI had signed MoU with PKSF. SDI had prepared training participant list. PKSF had selected 22 training institutions to provide training to the selected trainees in different regions of the country.

### Selected Trades under SEIP Project:

The Trade/Courses that have been selected from six high growth priority sectors of Bangladesh were as follows:

# SDI's Programme's for Uplifting the Quality of the Lives of Elderly People Programme

SDI as a partner of PKSF has introduced the 'Uplifting the Quality of the Lives of Elderly People Programme' in line with the government's elderly policy. The programme assists elderly people to access social safety services, financial benefits and primary health care services for the elder person. Funding of the programme is being mobilized from 'Special Fund' and 'Programmes-Support Fund' of PKSF with 10 percent surplus of credit programmes of SDI. PKSF bears 50 % while SDI bear the rest operational expenditure. As part of the plan of action a survey has been conducted to find out the socio-economic status of the targeted elderly people. Elderly programme is essentially managed by local elderly people. The elderly people have been provided leadership and communication skill development training to increase their negotiation skills.

#### **ELDERLY SOCIAL CENTRE (ESC):**

Under this programme, SDI has established Elderly Social Centre in the FTC campus. Currently the elderly citizens meet in the library room of the FTC. This multi-purpose social centre is a common platform for the elderly people. The ESC satisfies the recreational as well as social needs of the elderly people.

SDI is mobilising local philanthropists to donate cash or land for the social centre. The proposed facility will have various types of recreational materials of indoor games, e.g. Carom, Luddu and television, newspapers etc.

oLD AGE ALLOWANCE (OAA): To cover the basic needs of the elder people, provision of Old Age Allowance has been made for the underprivileged elderly people. With this allowance many elderly people are being able to buy necessary medicines and avail treatment of their old aged complications. SDI has provided monthly BDT 500/per elderly citizen as OAA to 425 elderly citizens.

SPECIAL ASSISTANCE: This programme offers different assistive materials to ease the lives of the elderly people. SDI had given10 wheel chairs, 100 umbrellas, 100 walking sticks, 100 raised commodes, 250 blankets and 250 sets of warm cloths to elderly citizens of the area.

AWARDING ELDERLY PEOPLE: Recognizing the contribution of the elderly people towards the society SDI had awarded the sons and youth for their support to the elderly people. The programme has provision of health and care facilities for the elderly people. Under this programme, there is a provision rehabilitate vulnerable elderly to a family in his/her locality. With the Old Age Allowance, many elderly people try to improve their lives.

#### Rally and discussion meeting to celebrate InternationI Day for the Elderly Citizens for 2018.

Acolorful rally of the elderly citizens was organized by SDI at Sutipara of Dhamrai. A large number of elderly citizens, and general public took part in a procession. The ED of SDI led the procession. At the end of the street march a discussion meeting was held at the conference centre of FTC of SDI at Sutipara. Valiant freedom fighter of Liberation Warof 1971, Mr. Saheb Ali of Sutipara presided over the meeting. The meetingwas addressed by SDI's ED and Freedom Fighter Habibur Rahman, Teacher Mr. Sushil Kumar Sarkar, and Journalist Mr. Mizanur Rahman. Senior SDI officersof SDI, Mr. Kamruzaman, Ms. Sohelia Nazneen Haque, Mr. M Ismail Haque, had also addressed the gathering.

Under SDI's Programme 'Improving the Quality of Life of the Elderly Citizens' on 29th Septembere 2018, wheel chairs and old age allowances were disbursed to elderly citizens at FTC of SDI at Sutipara. The event was presided over by the ED of SDI. The chief guest was Mr. Abul Kalam, the UNO Dhamrai. The special guest was, the OC (investigations), Dhamrai PS, Mr. Ashikuzzaman. Mr. Rezaul Karim Raza the Chairman of Sutipara UP, Veteran freedom fighter Saheb Alialso addressed the gathering.

#### Sports for Elderly Citizens and Chidren held

Under SDI programme for Imrpoving the Quality of Life of the People' programme on 5th May 2018 sports of the elderly people and the children were held at FTC campus. The programme also included art competition and production of Wall paper. Prof. M Abul Hossian, PhD, the Chairman of SDI, theEx Pro VC of the Jahangirnagar University was the chief guest. Mr. Ashim Kumar Bala, the Jt. Secy Ministry of Fisheries and Livestocks was the special guest. Mr. Chitta Majumdar, the Managing Director of Majumdar Group of Industries and Ms Sohelia Nazneen Haque Assistant Director SDI also spoke on the occassion. The ED of SDI presided over the prize giving ceremony.

### **Cultural and Sports Programme**

As a part of inclusive initiatives for sustainable poverty reduction and beyond-poverty development, SDI in partnership with PKSF has undertaken the 'Cultural and Sports Programme' for children and young generation. The aim of this Program is to patronize and promote mental & physical development of the young people. The main objectives of the Program are to create awareness among the young and adolescents generation against all sorts of crimes as: terrorism, sexual harassment, drug abasement, and women-violence or oppression etc. The expenditures of the program was being borne jointly by PKSF and SDI.

SDI had organized different sports activities including a Football tournament at Dhamrai. SDI has undertaken the following cultural activities- drawing, hand writing, wall magazine, recitation, story-telling, Rabindra and Nazrul songs, folk songs, local songs, acting, and country songs. To protect the future generation from the adverse impacts of climate change, SDI has taken initiatives of planting trees in school yard and encourage students to plant more trees in fallow lands. Besides, cleanliness activities are also undertaken in school and colleges premises under this program. ETHICS AND VALUES DEVELOPMENTintervention, different awareness campaigns were carried out to awake the people against activities like: child marriage, drugs addiction, sexual harassment etc.

# SDI Promotes Women entrepreneurs to produce Vermi composte.

About 50 women of Dhamrai could make their household self-reilaint by producing and selling vermi composte. They were producing vermi composte side by side with doing their daily chores. SDI had arranged for their training and provided technical support and credit line. SDI had also arranged for marketing of their vermi composte.

Vermi composte is a biolgical fertilizer and crops produced using bio fertilizer are safe for human consumption. The ED of SDI had stated that with the increase in people's health consciousness, the demand for food produce using bio compste is growing.

The farmer do cow fattening targhetting sales prospect in cattel market for Muslim Festival of Eid ul Azha. SDI provides technical support and credit for fattening of cattles without using hormones etc. SDI livestock programme staff work for raising awarenss of both the farmers as well as consumers. SDI provides training, arranges artificaal insemination with the help of the Upazila level Livestock Department and health care services, SDI also provide crdit to the cattle farmers.

### Vegetable Cold storage for vegetable farmers in Dhamrai

The farmers of Dhamari produce different types vegetables round the year. A good number of vegetable farmers were producing vegetables without using toxic chemical fertilizers. The problem of vegetable farmers being storing their vegetables until the price is good at the market. At present a huge quantity of unsold vegetable being spoiled due tolack of storage facilities nearer to vegetable fields or at the marketplace. SDI had installed 2 vegetable storage at two points of Dhamrai. IFAD and PKSF had jointly financed the estblishment of the storages. One coldstorage is of 8 tons and the other one was of 4 tons capacity. These cold storages can keep vegeables fresh for a maximum period of 30-40 days. Radish and green tomatoes can be kept fresh for a maximum

period of 25 days. The importance of the storage system is that, no chemical being used for keeping the vegetables fresh. So the margin of profit will be quite good for the farmers. The storage authority will charge a storage rental/day at the rate of Tk .0.50/ kg/day.

#### Free Medical Service Camp

On 24th January 2018 annual sports and prize distribution ceremony of ther Valum Ataur Rahman Khan College was held. The sports programme was inaugurated by Mr. Shamsul Haque, a member of the executive committee of the college also the Executive Director of SDI.

The prize giving ceremony was presided over by Prof. Salimullah, the Principal of the college. The Chief Guest was the veteran freedom fighter Mr. Benazir Ahmed, the Ex MP and the President of the Dhaka District Awami League. The special guest was local UP Chairman, Mr. Rezaul Karim Razaand Mr. A Matin the ED of SHOJAG. SDI had set up a free Medical service camp at the sports venue.

#### SDI HOLDS BIJOY MELA AT FTC

SDI had hold BIJOY MELA 2019 at FTC. Honorable MP of Dhaka-20veteran freedom fighter Mr. Benjir Ahmed inaugurated the fair. The ED of SDI presided over the opening ceremony. Different working areas of SDI had set up 25 stalls and displayed various products produced by its members. The toxin free vegetable and PATALI GUR of Jhitka were the chief attraction of the exhibition. Handicrafts produced by grassroots level members of SDI were dispalyed in varios stalls. At the end of the discussion meeting on last day of Mela, Blankets and

Cotton Shawl (Chador), Umbrella, Walking sticks, Wheel Chairs, Plastic Commode with chair, Elderly allowance were given to poor and elderly people.

#### MICROFINANCE PROGRAM IS FACILITATING SAFE WATER TO HOUSEHOLDS

SDI and PUREIT Program of Lever BrothersBangladesh had joined forces to ensure availability of safe driniking water in4 villages of Dhamrai and Savar Upazilas. SDI s providing interest free credit to be repaid in monthly installments to purchasers of PUREIT system. Each PUREIT device can supply 1500 litres of safe water without repalcing its water purification cartridges. At the time of reporting 445 families hadinstalled to PUREIT system.

#### Metrological Observatoryon the top of FTC of SDI

Agriculture inBangladesh is very much dependent on the weather. So if farmers has knowledge of the weather ahead, they can be better prepared to reduce loss due to weather. SDI has set up a weather station on thetop of its Farmers Training Centre at Sutipara. Department of Meterology of the Govt of Bangladesh had supplied and installed the equipments. The information gathered by the weather station can be monitored directly at the monitoring panel installed at the FTC Office. The forecast being informed to the farmers by SDIs project staff who visits the groups every day on routine. Farmers of Dhamrai area had reporteded that advanced weather report had helped them to take actions to reduce loss.

### **Grass Cultivation Leads Way Out of Poverty**

Ward #1 of Rahmatpur union is a erosion prone area of Western side of Sandwip Sandwip upazila. Just on the west mighty river the Meghna flows past the area. The ward # 1 is within the polder constructed by the Water Development Board (BWDB) of the GoB. But the area of the ward is shrinking year on due to relentless erosion. Only 70 households now dwell in the ward. 95% of these households are farmer households. All these households in the past possessed large tracts of farm lands. But erosion had devoured much of the land. Many households had migrated to other areas after losing home and hearth or living on other peoples mercy.

Tajul Islam and Kamal Hossain are turning their seventies. Both were the residents of ward #1. Rezia the wife of Kamal Hossain and Monowara the wife of Tajul Islam, both them are the very proactive members of the Shapla CBO under the RECALL Project SDI. Once they too were affluent farmers, but Mighty Meghna had took away everything they possessed. Kamal and Tajul are now share cropper farmers. But in ward #1, there is not enough cultivable land suitable for rice cultivation. Salinity and water-logging have also degraded the quality of the soil and reduced capacity of rice production.

In the above backdrop, for the last two years the CBO members were carrying out dialogues among themselves to find a way out of the situation. The issue was alternative farming to offset the impact of climate change phenomenon affecting their lives and livelihood. Md Faysal Hossain, the CJRF Project's Technical Officer-CAIGT and Badal Chandra Roy, the REE-CALL Project's Facilitator facilitated the dialogue process. The CBO members noted that Jamshed the local LEB member had recently started growing a variety of grass (German grass) in a waterlogged land belong to him and getting a good dividend thereof. The success gets hold of the imagination of the CBO members. But they were very cautious about stepping into uncharted water. So it was decided that Kamal Hossain and Tajul Islam will cultivate German grass in demonstration plots financed by the REE-CALL Project SDI in 2018. The project provided each

of them financial assistance worth Tk. 6700. Both the families contributed their labor, in land preparation, the land, buying fertilizers/manures, and planting grass seedlings. The Upazila Livestock Officer Mr. Atikur Rahman and Faysal Hossain the CJRF Project's Technical Officer-CAIGT were there to give them technical support and incentives.

Tajul and Kamal cultivated grass on 13 decimal acre and 25 decimal acre land respectively. In months time grass grown to right size for cropping. They first of all allowed their own cows to graze and sold the remainder of the grass to other farmers.

In the 21 month period since they had started grass farming, Tajul's family sold grass and milk and made profit of Tk. 36500 from grass and Tk. 42,000 by selling cow milk. On the other hand Kamal and his wife made profit of Tk 34,000 by selling grass and made a profit of Tk.58,000 from cow milk sales.

Tajul and his wife now own 5 cows including 2 milk cow. Kamal family owns 7 cows including 3 milk cow. The families are had now lifted themselves above poverty level.

The success of Kamal and Tajul had enthused no less than 40 of their neighbor to adopt grass farming. Notable among them are Kanu Maladar, Shafik, Alauddin, Tanim, Mostofa, Saiful, Shek Farid, Noor Alam, Mobasher, Joynal, Toyub. The practice of grass cultivation and keeping milk cows is spreading rapidly in the ward #1. Specially, grass cultivation has become the most viable income earning alternative among the farmers who are victims of erosion waterlog victim.

Besides these SDI supported Napier Packchong grass cutting for 60 families of Buffalo Development Value Chain Entrepreneurs of Sandwip and Urirchar under Buffalo Development Valuechain Project. The grass produced well at more moisture land where other crop didn't grow well.

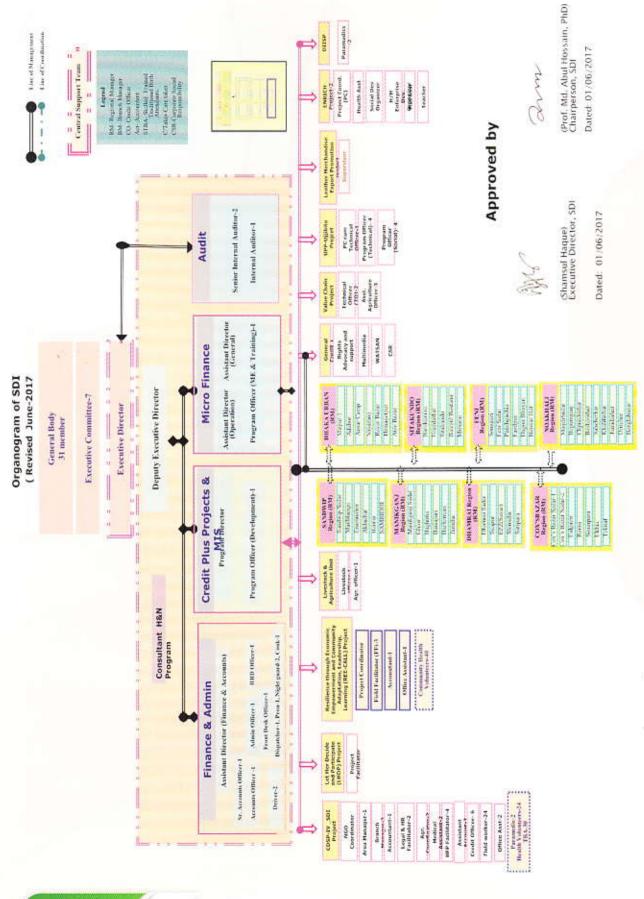

Now grass cultivation becoming thealternative main occupation in some area of Sandwip instead of paddy or other traditional crop cultivation.

### INDEPENDENT AUDITOR'S REPORT

We have audited the accompanying consolidated financial statements of "Society for Development Initiatives (SDI)" which comprise the Statement of Consolidated Financial Position as at June 30, 2019 along with Consolidated Income & Expenditure Account and Consolidated Receipts and Payments Accounts for the year then ended June 30, 2019 and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements: Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Society for Development Initiatives (SDI) requirement and other applicable laws and regulations. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

#### Auditor's Responsibility:

Our responsibility is to express an opinion on these consolidated financial statements of the organization based on our audit. The assets and liabilities as at June 30, 2019 and income and expenditure account for the year ended June 30, 2019 of the organization's six project namely Micro Credit Program, Grihayan Tahobil, General Fund, Char Development & Settlement Project-IV (CDSP-IV), Sanitation Project and Resilience through Economic Empowerment, Climate Adaptation, Leadership and Learning (REE-CALL) have been consolidated and accounted for in the consolidated financial statements. The financial statements of the above projects has been audited by independent auditors whose reports has been furnished to us and included for consolidation and our opinion is based so far as it relates to those reports included in respect of the organization's project. In addition, we have performed our audit procedure for consolidated purpose, based on which the financial statements of the project have been consolidated. We conducted our audit in accordance with Bangladesh Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements of the company are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion:

In our opinion, the Consolidated financial statements give a true and fair view of the financial position of Society for Development Initiatives (SDI) as at June 30, 2019 and of its financial performance and its receipts & Payments for the year then ended in accordance with the basis of accounting described under note # 4.01, SDI requirement and comply with the other applicable laws and regulations.
